

## Product Overview

### Revolutionary self-service payment technology

“Millions of people use Invenco technology every day without ever knowing it.”

Built on a completely open platform, Invenco has set about capturing the self-service payment market with a range of EMV and PCI compliant Outdoor Payment Terminals (OPTs). Designed from the ground-up, Invenco OPTs are made to retrofit into virtually any kiosk, stand or fuel dispenser.

Having introduced the first 12.1” touchscreen on an OPT, Invenco has continued to innovate, delivering a unique customer engagement and entertainment experience to its touch screens. When paired with Invenco Cloud Services (ICS) you can manage your entire customer experience, remotely deploying software updates, to greatly reduce service cost and maintenance headaches.

Partnering with world leaders in the payment space, Invenco continues to grow its global impact in EMEA, SE Asia, North and South America and the Asia Pacific region from its New Zealand base. Sold almost entirely under our partners’ brands, very few people realize the technology they are using is made by Invenco.

# Outdoor Payment Terminals

## G7 OPT Modular Outdoor Payment Terminal

The world's first 12.1" robust color touchscreen on an OPT. Delivering a truly interactive media experience to your customers with video advertizing, on screen promotions and touchscreen apps. You can configure the modules to best fit the available space for retrofit. Transform your business and create new revenue streams virtually overnight.

- ▶ Fully EMV compliant and PCI PTS PED certified
- ▶ Customized user-experience — grow repeat business

single card reader

Barcode reader  
for loyalty and  
discount schemes

Supports EMV,  
contactless, NFC,  
Apple Pay® and  
Android Pay™

USB and  
RS-232/485 support  
for stand-alone  
peripherals such  
as receipt printers

“Self-service payment products, people simply couldn't imagine living without”

## G6 OPT All-in-One Outdoor Payment Terminal

The G6 OPT's compact footprint fits a wide range of housings and takes just minutes to install. Cloud connected as standard; you get to add new revenue streams with video and advertising while cutting out service costs with cloud managed upgrades. Build your own applications on our open SDK to further enhance your customers' experience.

- ▶ Open platform—customize your user experience
- ▶ PCI PTS certified
- ▶ EMV compliant—supports all major forms of payment
- ▶ The perfect solution for value-conscious customers

5" color display  
with integrated  
antenna for EMV  
contactless, NFC,  
Apple Pay® and  
Android Pay™

Integrated  
barcode, scanner  
and receipt  
printer

Supports EMV  
chip card and  
magstripe in a  
single card reader

# Invenco Cloud Services

Invenco Cloud Services (ICS) is PCI DSS certified. It enables retailers to: manage their network of devices, lower overall operational costs and manage device uptime, drive brand and promotional activity across all their stores. There really is nothing else like it!

SOFTWARE DOWNLOADS	PREDICTIVE MAINTENANCE	UPTIME	MEDIA MANAGEMENT	ASSET MANAGEMENT	
Packaged upgrades	Uses rules engine	Prioritized alarms	Build library & playlists	Store asset & version info	<b>CLOUD SERVICES</b>
1:1 delivery mechanism for each site	Generate EPS data & route local device data	EPS alarms and route device alarms to cloud	Media upgrades for multiple terminals	Reports version and serial info to cloud	<b>EPS</b>
Secure, local upgrade	Drives maintenance analysis	Alarms for key events, metrics	Media updates as needed	Report version & serial no. info	<b>TERMINALS</b>

REMOTE KEY INJECTION	POINT-TO-POINT ENCRYPTION	TOKENIZATION	LOYALTY PLATFORMS INTEGRATION	MOBILE WALLET PAYMENT	
Encrypted key packages in cloud	Ultimate point of key changeover	Token vault protects customer data	Support multiple loyalty host	API multiple cloud wallet providers	<b>CLOUD SERVICES</b>
Key package delivery to terminals	First point of key change over	Token caching for faster transactions	Loyalty engine: drive consumer behavior	Mobile authorization	<b>EPS</b>
Processes key package and updates key	Original encryption point	Secure terminal tokenization	Engaging user experience; drives sales	Enables one button pay	<b>TERMINALS</b>

# More from Invenco

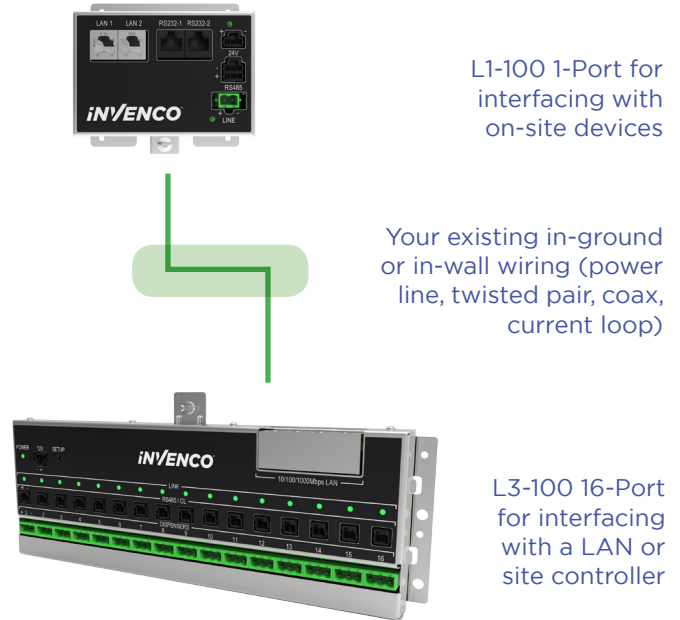

## Invenco Link - Ethernet and Serial run concurrently on your existing wiring.

Create a high-speed Ethernet network between devices using your existing wiring—no digging, no rewiring and with the absolute minimum disruption.

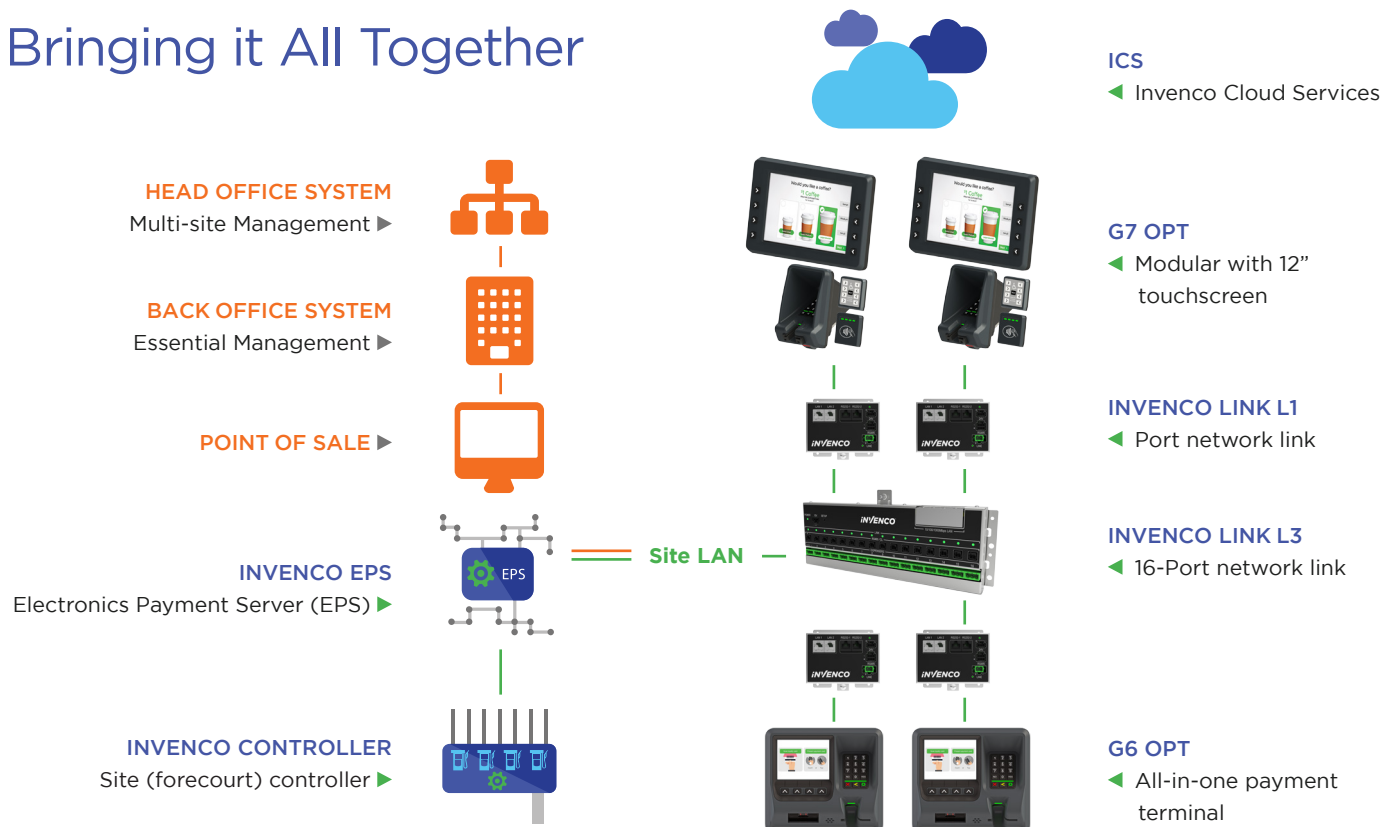

You get robust connectivity across all your assets and your LAN or site controller. A highly cost effective solution that will prime your business for the speed you need to compete—today and into the future.

### KEY FEATURES

- ▶ Makes use of any copper wiring including power line, twisted pair, coaxial.
- ▶ Based on IEEE 1901 (high definition powerline communication).
- ▶ Supports multiple network topologies—including line, tree, star and ring.
- ▶ Transparent connection between LAN devices.

## Invenco for the Forecourt - Bringing it All Together

# The power of being open

Invenco prides itself on having created a truly open platform. It gives you the greatest possible choice as to how you build the forecourt experience for your customers and employees. It means you aren't tied to using the solution we've outlined above – but you can customize it to meet your business needs and operational constraints.

Unlike major pump manufacturers we don't lock you into using our proprietary hardware, solutions or services. Instead we provide the tools to enable third-parties to connect to our devices and build applications to be used on our hardware. It puts you in the driving seat and opens-up thousands of possibilities:

- ▶ No matter what brand of pump you have on your forecourt we can retrofit to it
- ▶ Use our protocols to design your own OPT workflows
- ▶ Connect to your preferred front office and back office solutions – or choose ours
- ▶ All our OPTs are securely cloud connected – delivering media and graphics using the provider of your choice plus accurate performance reporting from the forecourt
- ▶ Not sure of what the future may bring? An open platform gives you the greatest possible range of options moving forward.

“Discover the world's first truly open forecourt solution”
