

PassFort

Digital transformation of customer onboarding

Digitise KYC, AML and compliance checks to create efficiency and great customer experiences.

Automate onboarding journeys with PassFort

Process compliance checks for different products and jurisdictions swiftly and seamlessly. Use PassFort to achieve a faster time to first decision, reduce drop-off rates and scale customer due diligence for future growth.

Super-charge the experience

Take existing risk and compliance policies and super-charge them with a single SaaS solution.

Customers have a faster and frictionless experience of applying for products. And, you create efficiency in onboarding and compliance teams with one platform to manage checks and monitor ongoing risk.

Transform existing policies

1

Monitor onboarding trends

2

Iterate & improve the process

3

Integrated data providers

Through the PassFort Integration Hub, connect to a world of data providers. If you have a selection made, bring them together in PassFort. If you haven't decided, review the options and match choices to the compliance checks you want to complete.

Digital policy builder

Tailor your customer onboarding journeys in the flexible 'no-code' Policy Builder. It's simple to iterate and adapt the checks you run as your business or regulation changes. Maximise Straight Through Processing (STP) for each product and jurisdiction you operate in.

Manage & monitor risk

Your team collaborate in a single, secure space – managing applications and monitoring ongoing risk. When manual intervention is needed on a case, that is flagged in the PassFort Portal, so they can get right on it. Everyone is more efficient, and customers have a better experience.
