Table shows basic weed activity from Rotam trials.
(BP) – BEST PERFORMERS.

NB. Where blank no data collected in Rotam trials.

S – Very Susceptible: 95%+

MS – Moderately Susceptible: 80-94%

MR – Moderately Resistant: 65-79%

R – Resistant: <64%

'Sequencing' with any one of the following other sulfonylureas and 'ALS inhibiting' herbicides may be applied to a crop treated with Ergon. 'Sequencing' is the use of Ergon in tank mixture or sequence with one of the products listed in the following table. Note the specifications for following crops.
