INTRODUCTION

This online payment gateway has provided feature-rich services and solutions to hundreds of their clients in the private and public sectors for over 20 years. They have become a national leader in the ePayment industry by specializing in the design and implementation of industry-leading gateway solutions. They've set themselves apart by offering secure, centralized payment management that adapts to the needs of all businesses regardless of their size or industry.

IMPLEMENTATION

Adherence to the Payment Card Industry Data Security Standard (PCI DSS) is a requirement for payment processors. StrongKey's Card Capture Service (CCS) and security appliances allow this organization to process billions of dollars in online payments annually while maintaining the highest level of security standards.

Using StrongKey's industry-leading solutions allows this online payment processing company to safely encrypt and tokenize credit card numbers and other personally identifiable information (PII). Their 10-year relationship with StrongKey has facilitated their path towards meeting compliance requirements, including PCI DSS, ISO 27001, FFIEC, GLBA, and IRS 1075, among others.

RESULTS

For this company, the benefits of working with StrongKey have included:

- Reduced scope of time for PCI compliance auditing
- Secure processing of billions of dollars annually in card-present and card-not-present transactions for 10 years
- Cost reductions that are a result of our flat-fee pricing model (vs. pay-per-use)
- Tokenization of databases for safer and more efficient transaction processing
- Trust from government and health care clients
