

Effortless visitor check-in via integration with Envoy for streamlined campus services.

## CHECK-IN

Guests use an Envoy kiosk to sign-in as a visitor to your company's campus.

## CAMPUS SPONSOR

During check-in, a sponsor is defined. This person is the main point of contact for the guest during their visit.

## NOTIFICATION

Upon successful sign-in, the sponsor receives a real-time alert that their guest has arrived.

## LOCATION, LOCATION, ...

The guest's location is identified on the campus with the lobby or building where they have signed in. Sponsors can click and go with live map integration.

## PICTURE PERFECT!

Included is a picture of the guest to make first time identification a breeze — especially amidst a crowded lobby.

**VISITOR ALERTS** enables real-time communications through mobile alerts to visitors and their main point of contact during their visit.

The integration between Envoy and the CXApp enables real-time communications through mobile alerts before, during, and after a visit.
