Update: Ohio Living Rockynol

3-21-2020

We are saddened to share that an Ohio Living Rockynol resident, who was occupying a private room while at the campus for a short-term stay, was diagnosed with COVID-19 and has been transferred to a local hospital for treatment. Effective March 3 we began to limit visitation on campus, and we have proactively implemented all CDC precautions and guidelines for containment while working under the direction of the Ohio Department of Health. We have been, and will continue to be, vigilant with infection control protective measures for all residents, patients and employees in order to protect our campus. Our community is like family, and we all share concern about each other during this time. Our hearts and prayers are with the affected resident and their family.
