DECON BAGS

AN INITIATIVE OF THE FIRE-DEX “**WE CARE**” CAMPAIGN

WE CARE about you, your crew and your families. That’s why we make your health and safety our #1 priority.

So, it’s time to ditch the old trash bags. Use decon bags during on-scene decontamination to isolate soiled gear.

Protect yourself from potentially harmful fireground particles and keep your cab clean with our step by step recommendation for collecting soiled PPE.

STEP
1

Follow your department’s on-scene decon procedure.

STEP
2

Fill in the bag label with your name, department’s name, shift, date, and any additional comments.

STEP
3

Pack your soiled turnouts, hoods, gloves, etc. into the provided decon bag.

STEP
4

Store your decon bag away from other equipment.

STEP
5

Arrange gear cleaning and disposal of decon bag.

Fire-Dex distributes a decon bag with every turnout coat. It’s just one more way we show **WE CARE!**
