

Secure Your Real Estate Assets with Blackpoint Cyber 24/7 Managed Detection and Response

As real estate becomes more inter-connected and cyber criminals more bold, protecting building systems and the people inside from cyber threats is increasingly challenging. Cyber attacks involving Internet of Things (IoT) devices and Operational Technology (OT) have increased steadily in the past three years.

THE SOLUTION: 24/7 Managed Detection and Response (MDR)

A dedicated, around-the-clock team focused on monitoring your critical assets, detecting malicious cyber activity, and rapidly responding to avoid damage to your property and brand.

67%

of companies have experienced a security incident related to unmanaged or IoT devices

87%

likelihood of an organization experiencing a cyber attack caused by unsecured IoT devices or applications in the next 24 months

80%

of risk professionals cannot identify a majority of their organization's IoT devices

HOW IT WORKS

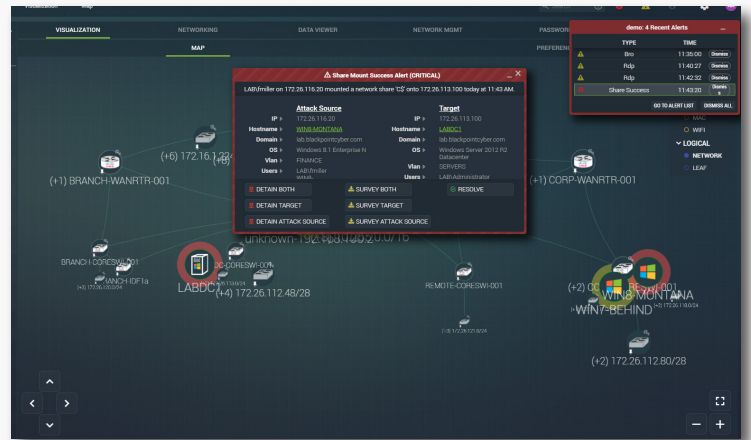

- 1 We deploy our patented MDR technology in your property (typically in less than a day)
- 2 Our technology immediately begins detecting all devices and monitoring for threats
- 3 Our MDR team monitors your IT, IoT, and BAS systems for cyber threats 24/7

WHAT YOU GET

- Initial property cyber risk assessment
- Monthly MDR reports
- 24/7 monitoring, detection, and response
- Visibility into all devices across your property
- Access to cyber security experts
- Pre-determined response plan
- Reduced cyber risk to property and brand

Blackpoint's 24/7 Security Operations Center (SOC)

Real-time infrastructure visibility
