CASE STUDY

Columbus Blue Jackets Suite Level Offices

PROJECT

When the Columbus Blue Jackets needed to refresh and modernize their suite-level offices, they turned to their Proud Work Environment Partner, Continental Office, to make it happen! The goal was to create a space that made the most of their existing footprint, something that would improve efficiency while also rejuvenating an aging office.

RESULTS

From furniture to flooring, this new space is much improved! Creative desk solutions and a more functional kitchen made more sense of their existing space and its unique shape, and beautiful new flooring throughout the entire level brightened up the office from end to end. Pull-out lateral files with cushions create additional seating throughout the space, a feature that was quickly enjoyed by all employees! Function meets form in this gorgeous office renovation for our downtown Columbus neighbors.
