Cost per SF \$44.70

Design Firm Lupton Rausch

Contractor Corna Kokosing

Scope of Work Kitchen, Conference Room,
Private Office

Finishes High End - Wood Veneer,
Back-Painted Glass,
Powder-Coated Frames

The Project

This startup company wanted a loft-like feel in their industrial space. By keeping as much of the building's timber structure as exposed as possible and bringing in lots of natural light, they were able to keep alive what initially drew them to the space.

The Solution

Prefabricated construction solutions can be found throughout the space, from the cafe/kitchen entrance to the enclosed areas which include a soft seating room and a traditional conference room with built-in technology.
