Case Study

Pointview Elementary

Pointview Elementary, part of Westerville City Schools, wanted to create an exciting and fun learning environment to bring their students together. After gathering input from students and drawing inspiration from a water tower behind the school, they enlisted our help to create a one-of-a-kind, ocean-themed floor.

Results:

We worked alongside Tandus Centiva to install Luxury Vinyl Tile and laser-cut custom images of everything from seahorses and sharks to boats and mermaids. In addition, we cut a working sundial into the flooring material of their circular art room as well as created a large compass in the cafeteria.
