# DIRTT

ONCE A NEW  
TECHNOLOGY ROLLS  
OVER YOU, IF YOU'RE NOT  
PART OF THE STEAMROLLER,  
YOU'RE PART OF THE ROAD.

— *Stewart Brand*

An environment where technology is part of its DNA is an environment that should have DIRTT.

Start with clean, smart integration either inside the Walls or hanging from them. Monitors, CPUs, speakers, MP3 docks, USB ports, security readers... DIRTT Walls not only support these elements and their accompanying cabling, but they keep them secure while ensuring their accessibility for the right teams.

## DIRTT ENVIRONMENTAL SOLUTIONS

The parametric nature of the Walls means you further design them to suit your building, your furniture and your culture. Using DIRTT's intelligent, 3D software called ICE<sup>®</sup>, you experience your space in real-time, interactive 3D and modify it to create the exact space you want. Every change you make is automatically updated in the quote, specification and production information.

As it always does, technology will change. DIRTT Walls are impervious to change. Universal mounting abilities – inside and outside the Walls – mean whatever comes next will fit without demolition and rebuilding with all the attendant noise, material disposal and energy waste.

DIRTT Walls do not predict the future. They just go with it.
