

When you finish a construction project, you'll likely ask yourself:
Was it on time? Was it on budget? Does it look great?
Fortunately, these are the three things DIRTT excels at.

FLEXIBILITY

- Easily reconfigures and moves as your needs change
- Becomes an asset you can take
- Updates finishes and aesthetics without down time
- Folding Leaf wall increases functionality

SPEED

- As quick as a three-week lead time for production
- Installs cleanly, with little waste, and more rapidly than conventional construction
- Reduces revisions by 75%
- Integrates multiple construction trades

COST/LABOR

- Reduces the amount of field laborers needed from 20-30 (in traditional construction) to 3-5
- Pre-fabricated prior to installation; it's an adaptive approach to clean, rapid construction
- Reduces operating expenses by allowing access into walls for maintenance and repair without demo

*// Knowledge is knowing how to build it cheaper.
Wisdom is knowing how to build it better. That's what we do. //*
- Mogens Smed, CEO of DIRTT

INTEGRATED TECHNOLOGY

- Writeable surfaces with touchscreen capabilities
- Cleanable and out of reach from patients; an excellent means of infection prevention
- Easy to update over time as technology advances

BRANDING/ CULTURE

- Multiple options for integrating branding
- Engages associates and visitors with visually pleasing aesthetics
- Enables wayfinding and authentic messaging

COST ACCURACY

- ICE® software creates real-time pricing along with design flexibility
- 3D visualization for better understanding among constituents
- Flexibility produces exactly what was designed
