Case Study

Hopewell Works

Hopewell brings to life a work experience that connects people to their roots and instincts. Much like a student union, it's a public and private space that unifies the professional community, enables meaningful work, and fosters connection.

Results:

This project, from initial budgeting to move-in, accomplished Hopewell's vision. The modern layout showcases their brand and culture throughout, as well as provides a variety of spaces from meeting rooms to workshops and even social areas so members do productive work.
