Case Study

Maryhaven

Maryhaven has helped people and families dealing with addiction and/or mental illness find a path to recovery since 1953. With a modest budget, they wanted to create a donor wall as well as incorporate inspirational images and quotes throughout their space to make it more welcoming and impactful.

Results:

Using different depths of acrylic, Maryhaven was able to recognize different levels of donors while bringing dimension to their space. Pops of brand colors tie everything together, and blank donor tiles enable room for growth. Adding natural imagery with messages that depict overcoming a struggle allows people to relate to the space, and edge coloring enhances the wall graphics.
