

Get Things Working

## GET THINGS WORKING

When your gear is healthy, your business succeeds. When assets generate meaningful data, your business expands. GearJot is a collaborative fleet and asset management app that connects people, equipment, assets and data so more — and better — work gets done.

## Where People and Assets Work Together

- Our software acts as a central hub, gathering and keeping asset- and mixed fleet-generated data so your team is always connected and informed.
- Jots, GearJot's intuitive conversation and collaboration feature, make it easy for your team to work together, whether they're in the field or the office.

## Take Ownership of Your Fleet

- Maintain your equipment with custom, automated Service Alerts and Tasks that track progress from start to finish.
- Pulling in the right people at the right time to jobs done is simple; you have total control over who has access to what information.

## Maximize Every Asset and Site

- From shops and job sites to stop lights and parking meters, GearJot can provide or support telematics hardware and software to gather valuable data.
- With site- and asset-specific data, you can make better decisions, allocating resources when and where need them.

## Save Time, Save Money, Save Paper

- Simplify compliance and inspection processes with digital Forms that can be submitted electronically using almost any device.
- Since each asset and piece of gear has its own Facebook-like feed, accessing complete histories – whether you're at a desk or in the field – is effortless.

## Future-Ready, with Support for Telematics

- Achieve better utilization and cost-savings through more effective management of telematics data, regardless of provider.
- Stay updated on the health of your fleet and assets with real-time Service Alerts that convert automatically into Tasks.

## Plus:

- Improve safety by streamlining the process to fix reported problems.
- Reduce insurance costs by letting your provider confirm your compliance.
- Generate a detailed and accurate history of every asset increasing resale value.
