JOB TITLE: Junior DBA

STATUS: Full-Time preferred; contract possible

SALARY: DOE

Position Summary

Looking for highly ethical and professional Junior DBA to represent EASE at a client site located in Columbus, IN. This role will work closely with our client's personnel and a Functional Tester (also working for EASE) to assist with installation and troubleshooting of upgrades, new installs, and patches to our software. Prior experience and familiarity with .NET and SQL is required, Oracle experience is a plus.

Essential Duties and Responsibilities

- Configure various aspects of Ease software (adding features, installation, patching, upgrading, reconfiguring, etc.)
- Data Management (extractions, transformations, and loading, etc.)
- Document Management (Configuration changes, future plans, server activities, standards, etc.)
- Software maintenance (alerts, backups, clean-up, etc.)
- Manage time constraints and deadlines
- Report system conditions and future needs to management
- Participate in product readiness and release decisions

Minimum Qualifications (Education, Experience, Skills)

- BS degree or higher in computer science, information technology or software engineering or related field
- Demonstrated understanding of .NET and SQL
- Minimum of 1 year experience in similar position
- Working knowledge of the following technologies: cloud hosting platforms, storage, server and network infrastructure, TCP/IP networking and load balancers
- Excellent communication skills and the ability to develop and maintain effective internal and external working relationships
- Ability to take ownership and coordinate projects from beginning to end, working with multiple departments and outside organizations effectively

About Ease:

Ease builds innovative software for leading organizations by driving workforce efficiency, quality, and continuous improvement. Ease provides solutions in three areas:

- Work measurement tools used to build, manage and plan labor standards used to measure performance, improve processes and increase workforce efficiency.
- Document management tools that manage and deliver electronic work instructions, process improvement, change management and safety information to the operator and technician that are focused on improving quality, efficiency and safety.
- Audit and inspection tools that manage internal and external process audits, safety inspections as well as ISO and other certifications.

EASE offers a competitive base salary and benefits, including medical and dental as well as a 401(k) plan with an employer match.
