# CloudShell Provisioning Automation Solution for EMC VSPEX with Brocade

Quali CloudShell automates the full deployment of EMC VSPEX with Brocade, delivering faster time to market and lower deployment costs for VSPEX distributors and systems integrators
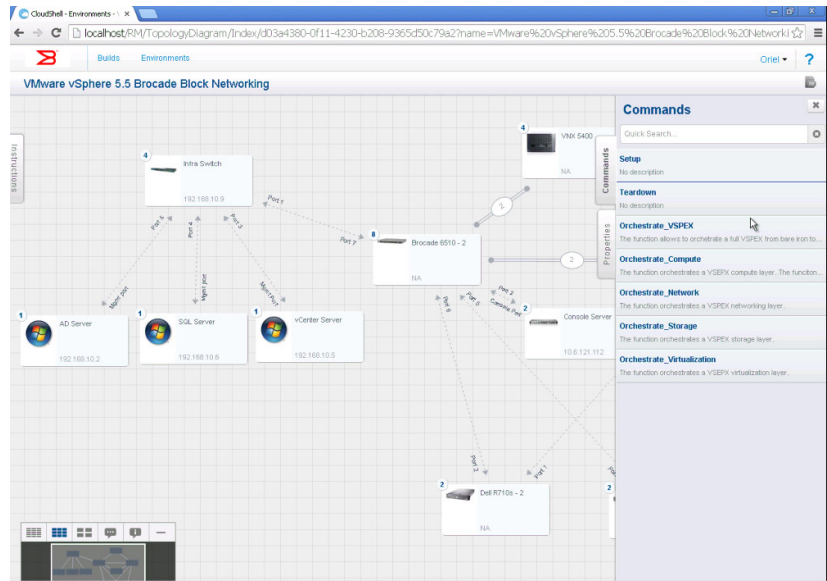

VSPEX is the leading reference architecture for transforming IT infrastructure. VSPEX is a simple, efficient, and flexible reference architecture comprised of EMC's award-winning storage systems and next-generation backup products, along with best-of-breed virtualization, server, and networking innovation from EMC alliance partner Brocade. VSPEX and Brocade enable cradle to grave enablement for delivering validated reference architecture solutions by supporting partner choice, differentiation and value-add.

CloudShell's powerful infrastructure orchestration and automation provides an easy to use, web self-service platform for automated provisioning that delivers fast, standardized VSPEX with Brocade deployments.

CloudShell Self-service Portal

CloudShell provides interactive, visual orchestration and automation that makes it easy to understand and track the provisioning process.

Benefits

CloudShell's automated provisioning for the EMC VSPEX with Brocade networking enables channel partners speed time to market and lower deployment cost by minimizing expertise requirements, reducing provisioning time, and ensuring quality, while supporting custom sizing and configurations. CloudShell's visual object-based automation authoring allows for easy customization of provisioning flows to include performance validation tests or other add-on components.

About Quali

Quali is a leading provider of Cloud Sandbox for automating the DevOps life-cycle. We give innovators control over their world by enabling them to create personalized replicas of even the most complex production environments inside of Sandboxes. The Global 100 depend on Quali to help them deliver their products and services faster to market with better quality
