SERVICE STRUCTURE AND FUNCTIONING

DENTAL CARE POLICY AND SUPPLEMENT

SERVICE STRUCTURE AND OPERATION

Caser puts at the disposal of its insured an extensive directory of oral medicine professionals equipped with all means of diagnosis and treatment with nationwide coverage for the provision of two types of service:

- **Care guarantee:** free services to which beneficiaries have access.
- **Services with special prices:** services paid for by the insured set at special prices. These services available to the insured have maximum prices that can be consulted prior to requesting a quotation.

You can consult the free services and maximum prices in force at the time at **caser.es**

ACCESS TO SERVICES

- **Selection of the professional:** the insured can freely select and access the professional of their choice from their local area or from amongst those listed in this directory.
- **Access to services:** to take advantage of dental services and special prices (if applicable), the insured will need to present their Caser health card.
- **Diagnosis and quotation:** the health professional, once the diagnosis is made, will prepare a quotation within the limits of the maximum recommended prices in force at the time, and this must be accepted by the insured before any treatment starts.
- **Treatment:** to begin treatment, it is essential for the insured to accept the quotation for treatments with an associated cost.
- **Payment for treatment:** the insured will directly pay the amount for the services provided, set within the maximum special price, to the doctor or centre. Procedures without cost to the insured will be invoiced directly by the doctor to Caser.

DENTAL MEDICAL DIRECTORY

This section lists all of the dentists that the insured can visit to receive dental care, subject to that established in the general terms of the policy.

These specialists are grouped together **by province**.
