FIFRA Section 2(ee) Recommendation

TO REDUCE RAIN-INDUCED CHERRY CRACKING AND INCREASE FRUIT FIRMNESS

This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or approved by EPA.

Please contact your Certis USA regional sales manager to determine the specific requirements for FIFRA §2(ee) recommendations in your respective state.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its label.

To reduce rain-induced cherry cracking and increase fruit firmness: Apply 0.25% to 1% solution (1-4 quarts Sil-MATRIX®/100 gal.) in 50 to 250 gallons finished spray per acre. Specific Use Restrictions:

1. Apply up to the day of harvest (0 day PHI).
2. Do not apply more than 10 quarts per acre (7.5 lb ai/a) per application.
3. Do not apply more than 20 gallons per acre (60 lb ai/a) per season.
4. Do not make postharvest applications.

All applicable directions, restrictions, and precautions on the EPA-registered labels are to be followed. This FIFRA Section 2(ee) recommendation contains new or additional directions for use of this product, which may not appear on the package label. Read and observe the precautionary statements plus all other information appearing on the product labels. **For Utah and Washington only, this recommendation is not required to be in the possession of the user at the time of pesticide application. For all states other than Utah and Washington, this recommendation must be in the possession of the user at the time of pesticide application.**

Read the Limitation of Warranty and Liability on the Section 3 Federal product label before buying or using this product. If terms are not acceptable, return the unopened package at once to Seller for full refund or purchase price paid. Use by Buyer or any other User constitutes acceptance of the Limitation and Warranty and Liability on the Section 3 product label.
