Eve Contact Irrigate with eyewash solution or clean water, holding the eyelids

apart, for at least 15 minutes. Obtain immediate medical

attention.

Skin Contact Wash affected skin with plenty of water. If symptoms develop,

obtain medical attention.

Inhalation Remove patient from exposure, keep warm and at rest. Obtain

medical attention.

Do not induce vomiting. Wash out mouth with water and give Ingestion

200-300 ml (half a pint) of water to drink. Obtain medical

attention.

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

8.1 Control parameters

SUBSTANCE.	Occupational Exposure Limits		
Silicic acid, potassium	No Occupational Exposure Limit assigned.		
salt	An exposure limit of 2 mg/m3 (15 min TWA) is recommended by analogy		
	with potassium hydroxide (UK EH40).		

8.2 Exposure controlsWear protective equipment to comply with good occupational

hygiene practice. Do not eat, drink or smoke at the work place. Engineering methods to prevent or control exposure are preferred. Methods include process or personnel enclosure,

mechanical ventilation (dilution and local exhaust), and control of

process conditions.

8.2.2 Personal Protection

8.2.1 Appropriate engineering

Respiratory protection Wear suitable respiratory protective equipment if exposure to

levels above the occupational exposure limit is likely.

Eye/face protection Chemical goggles (EN 166).

Skin protection Wear suitable protective clothing and gloves.

Plastic or rubber gloves. For example EN374-3, level 6

breakthrough time (>480min).

Wear suitable overalls. For example EN ISO 13982 (dust), EN

14605 (liquid splashes).

8.2.3 Environmental Exposure

Controls

controls

The primary hazard of potassium silicate is the alkalinity. Avoid

release to the environment.
