HOMEPLATE

TOTAL VEGETATION KILLER

Homeplate®

A new non-selective herbicide that is a Total Vegetation Killer and is effective against broadleaf weeds and grasses.

Strong and stable

Homeplate® is a new, non-selective, broad-spectrum, fatty acid, burndown herbicide. It works as a foliar contact spray to control a wide variety of weeds. This Total Vegetation Killer is labeled for use in all crops against broadleaf weeds and grasses such as:

- black nightshade
- Canada thistle
- catchweed bedstraw
- chickweed
- common lamb's quarter
- foxtail
- shepherd's purse
- wild chamomile

Stout and fast

Unique mode of action

Rainfast within three hours, Homeplate achieves total kill within 12 hours to 72 hours depending on environmental conditions.

Multiple uses

Homeplate is a multi-purpose workhorse and is labeled for use in:

Flexible

- direct and shielded sprays
- pre-plant applications
- post-harvest sprays
- harvest aid and desiccant
- sucker control

12-hour REI

- pruning and trimming

Unique

Homeplate features a unique mode of action that quickly kills the green parts of plants and shuts down photosynthesis. This causes the plants to essentially starve to death.

0-day PHI

It contains a blend of 44 percent caprylic acid and 36 percent capric acid as active ingredients. They are formulated into a highly soluble and stable formulation that allow for superior spreading and burndown for effective weed control.

Consistent, Convenient

NOP approved

Homeplate delivers consistent performance against target weeds on conventional and organic farms. It has a reentry interval (REI) of 12 hours and a zero-day pre-harvest interval (PHI). It is NOP labeled, OMRI® listed, has a CAUTION signal word and is MRL-exempt.

Innovative

MRL exempt

Homeplate is a powerful natural herbicide that complements multiple bio-based tools that growers seek today. Visit www.certisusa.com to view the most in-depth line of biopesticides available today.

Made in America

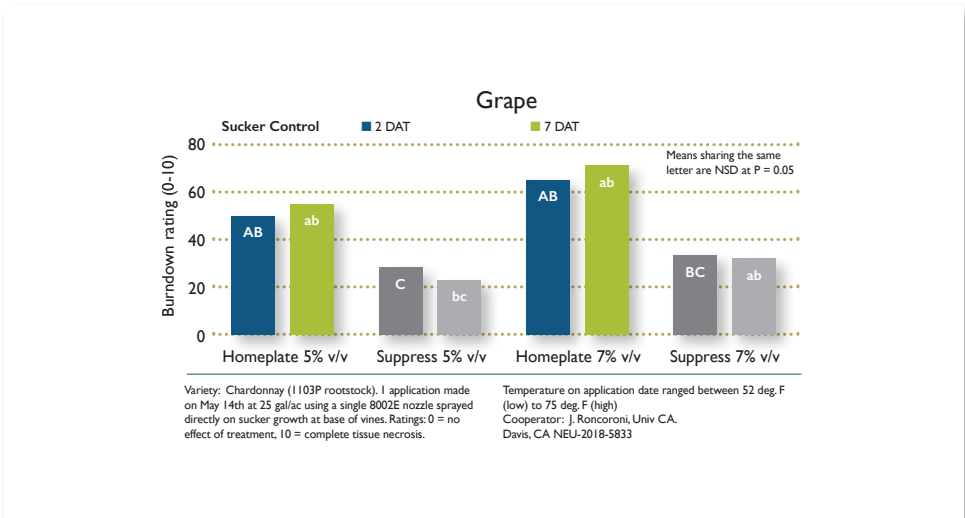

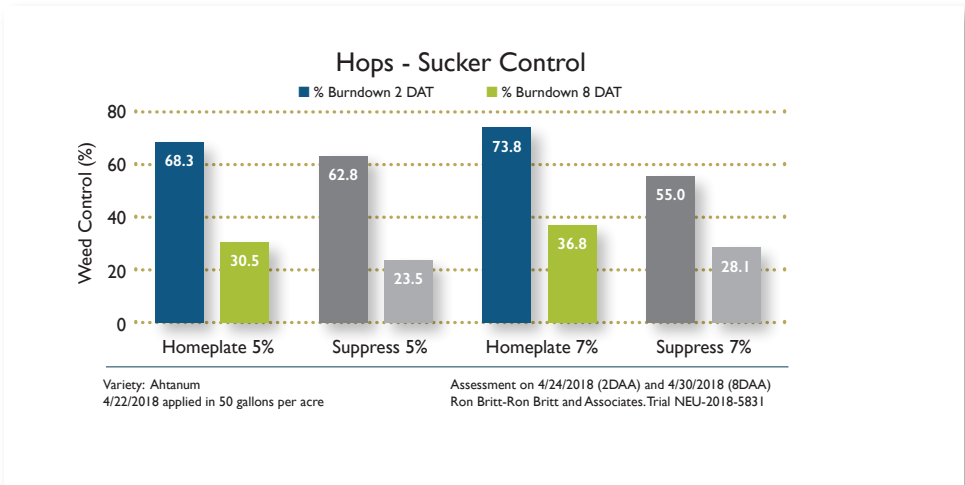

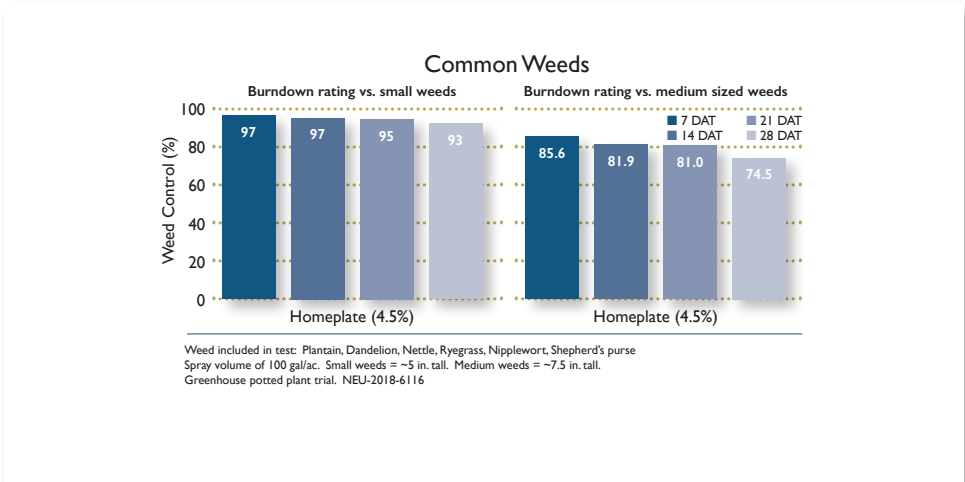

Homeplate is a registered trademark of W. Neudorff GmbH KG.

Proven Control

Homeplate delivers proven control. Extensive trials demonstrate efficacy in multiple types of crops.

Always read and carefully follow label instructions.
