## **MEMBRANE**

# 60 mil FiberTite-SM

**Product Data** 

Seaman Corporation's 60 mil FiberTite-SM features an 18 x 19 / 840 x 1,000 denier weft reinforced polyester knit fabric, coated with a proprietary compound, utilizing DuPont's™ Elvaloy® Ketone Ethylene Ester (KEE) as the principle polymer in the hybrid vinyl alloy coating.

### DESCRIPTION

60 mil FiberTite-SM is a 52-oz sq. yd/nominal 60-mil (1.5 mm) thick membrane. 60 mil FiberTite-SM exceeds all the minimum physical property requirements enumerated in ASTM D6754-15 Standard Specification for Ketone Ethylene Ester (KEE) Based Sheet Roofing and is manufactured by request.

Seaman Corporation is vertically integrated, which allows complete control over the manufacturing process from the selection of the yarns, to the engineering, knitting and weaving of the base fabrics to the final coating process. Today, FiberTite Roofing Membranes are the result of Seaman Corporation's 60 years of applied fabric engineering and coating technology.

All FiberTite Roofing Membranes are constructed using high tenacity/heavy weight varns to create a base fabric reinforcement to impart superior puncture, tensile and tear resistance properties. The base polyester fabrics are primed with a unique and proprietary adhesive coat that lays the foundation to physically bond the KEE coatings to the "fiber" to maximize seam strength and overall membrane performance.

60 mil FiberTite-SM is coated on the face with Seaman Corporation's original "KEE" formulation to provide superior hot air welding characteristics, extreme UV resistance, broad chemical resistance and long-term flexibility and reparability for the installed roofing membrane system. The back side of the membrane is coated with a slightly modified (SM) economical version of Seaman Corporation's original KEE compound to control membrane costs while offering additional thickness and weather ability. 60 mil FiberTite-SM exhibits excellent tear, puncture, fungus, algae and flame resistance that make FiberTite Roofing Systems some of the most sustainable roofing systems available.

60 mil FiberTite-SM membrane is manufactured in conventional 74-in wide by 80-ft roll goods. Field seaming of the membrane is accomplished by fusing the thermoplastic membrane with conventional hot air welding equipment.

ASTM D6754-15	Minimum Requirements	60 mil Typical
Thickness, mm (in.) ASTM D 751	0.81 (0.032)	1.52 (0.060 nom.)
Thickness over Fiber, mm (in) Optical method (inches)	0.18 (0.007)	0.56 (0.023)
Breaking Strength, N (lbf) ASTM D 751 proc. B - strip	1499 (338)	1557 (350)
Elongation at Break, % ASTM D 751 - strip	18	18
Tear Strength, N (lbf) ASTM D 751 Proc. B. Tongue Tear	338 (76)	445 (100)
Linear Dimensional Change ASTM D 1204 max (%)	1.3	0.63
Fabric Adhesion, N/m (lbf/in) ASTM D 751	3330 (19)	no peel
Retention of Properties after Heat Aging  ASTM D 3045 - 176°t/56 days  Breaking Strength, strip, % original  Elongation at Break, strip, % original	90 90	90 90
Low Temperature Bend after Heat Aging	-30	-40
Low Temperature Bend ASTM D 2136 (°f)	-30	-40
Change in Weight after Exposure in Water D 471 158° f, 166 h, one side only, max. (%)	0.0, +6.0	0.0, +3.7
Factory Seam Strength, N (lbf) ASTM D 751 Grab Method	1955 (440)	> Fabric Break
Hydrostatic Resistance, Mpa (psi) ASTM D751	4.1 (590)	5.5 (800)
Static Puncture Resistance ASTM D 5602 (99 lbf)	pass	pass
Dynamic Puncture Resistance (J)	10	> 25

# 60 mil FiberTite-SM Product Data

### APPLICATION

60 mil FiberTite-SM Roofing Systems carry extensive FM Global and Underwriters Laboratories approvals. 60 mil FiberTite-SM Roofing Systems can be installed by mechanically fastening the membrane with FiberTite Magnum Fasteners and Stress Plates or adhering the membrane in FTR 190e low VOC solvent borne bonding adhesive to pre-approved substrates. 60 mil FiberTite-SM can also be installed in typical ballast configurations using conventional stone or paver ballast.

For specific installation recommendations and requirements, please consult the most current versions of Seaman Corporation's Guide Specifications for the Installation of FiberTite Roofing Systems.
