Issue Date: December 1st, 2014
Issued By: FiberTite Technical Services
Re: FiberTite Membrane Greater than 60-mil

FiberTite® Phasing Out Thicker Membranes

2014.002 - Page One of One:

This notice is to announce that [Seaman Corporation](#) will phase out all [FiberTite](#) membranes of thickness greater than 60-mil. This process will take place over the next few months with a cutoff date for any products greater than 60-mil effective [April 1, 2015](#).

We firmly believe that the cost associated with thicker and subsequently heavier membranes does not translate directly into value for the customer. The fact that our nominal 36-mil [FiberTite](#) membranes have a life cycle greater than 20-years is an industry benchmark for value and performance.

Our 60-mil [FiberTite-SM](#), 60-mil [FiberTite-XT](#) and 60-mil [FiberTite XTreme](#) membranes will still be available and offer unequivocal physical properties for their respective reinforcements when compared to any thicker product on the market.

If you have any concerns or questions regarding this phase-out, please feel free to contact [FiberTite Technical Services](#) at: 1-800-927-8578.
