Issue Date: September 20th, 2016
Issued By: FiberTite Technical Services
Re: New FiberTite Seam Cleaner

FiberTite Seam Cleaner

2016.003 - Page One of One:

In support of our Authorized Applicators' quality control efforts, [Seaman Corporation](#) announces the addition of [FiberTite Seam Cleaner](#) to our accessory line. The [FiberTite Seam Cleaner](#) is now available and is packaged with two (2) one gallon cans per case.

[FiberTite Seam Cleaner](#) is the only approved roofing brand of seam cleaner for the [FiberTite Roofing System](#). To maintain consistency with FiberTite Specifications and Foreman Manual Guidelines, 100% pure Acetone is still an acceptable cleaner but must be generic in nature.

No other branded products will be permitted on the roof and the use of a non-approved cleaner will subject the installation to warranty disqualification.

Please review the [FiberTite Seam Cleaner](#) Product Data Sheet (PDS) and the Safety Data Sheet (SDS). Both of which can be found in the document library at www.fibertite.com.

For questions, please feel free to contact [FiberTite Technical Services](#) at: 1-800-927-8578.
