How to clean your EFTPOS terminal

1. Turn off and unplug the device.
2. Gently clean with a lightly water-dampened microfiber cloth.
3. Disinfect with an alcohol-based wipe, or alcohol-based cleaner applied to a microfiber cloth. Apply gently; do not scrub.
4. Once dry, reconnect to power and turn back on.

Never spray or pour any liquid directly onto the device

Clean terminal gently, do not scrub

What you can use

- Water
- Two drops of pH neutral soap
- 70-90% strength isopropyl alcohol applied to a microfiber cloth
- Isopropyl alcohol wipe

What not to use

- Bleach
- Hydrogen peroxide
- Thinners
- Ketone-based solvents
