Videos, reference guides, and role-specific curriculums can be used for new hire onboarding, ongoing training, or a quick refresher whenever needed.

Training staff and caregivers can be difficult for agencies. Field staff rarely come into the office, and the high turnover rate of caregivers makes it hard to keep up with training for new hires.

CellTrak LearningManager solves these challenges with a structured training solution that makes the management and delivery of training easier and more cost-effective – and improves your staff productivity and care delivery across the board.

With this platform, staff can access a library of CellTrak-developed educational videos and reference guides anytime, using the same device or computer they use to access CellTrak. Office staff no longer need to coordinate field staff schedules to bring them into the office for training, which in turn reduces mileage costs and frees up field staff to spend more time with clients.

Role-specific materials within CellTrak LearningManager make it easy to target training to the individual. Managers can also easily monitor individual progress and performance, so that additional training, materials, and coaching can be provided to anyone needing more help with certain courses or topics. The result is a workforce that is educated, informed, and prepared to deliver the best care possible.

Improve Productivity

- Train staff easily and quickly.
- Provide 24/7 access to resources.
- Increase the time field staff can spend with clients by reducing the need for office-based training.
- Reduce the time office staff spends organizing and delivering training.
- Monitor training progress and identify additional coaching needs.

Reduce Costs

- Decrease mileage costs by eliminating staff travel to and from the office for training.
- Eliminate the printing and labor costs to create training content.
- Eliminate the opportunity costs of taking caregivers out of the field for training.

Increase Job Satisfaction

- Empower staff with high-quality, user-friendly materials developed and maintained by CellTrak.
- Eliminate the need for current staff to take time to train new staff.
- Help field staff feel more connected to the office by having all resources in one location for easy access at any time, from any device.

Improve Care Quality

- Provide role-specific curriculums.
- Identify areas staff struggle with to continually improve training.
