

Informed Timely Care

CellTrak TimeManager™ maximizes your agency's return on investment with streamlined communication, updated schedules and proven reduction in mileage and travel reimbursement. TimeManager replaces inefficient paper based processes with an easy to use mobile app and administrative portal.

With TimeManager, you keep your staff safe and productive by monitoring their real-time activities at the point of care. Up-to-the minute scheduling changes are communicated seamlessly to better utilize staff time, adding revenue back to your bottom line.

“One of the advantages CellTrak offers is the ability for the field staff to continue to capture their visit in very rural areas with low connectivity. This is considered a real value-add within the industry. The staff loves using CellTrak, giving them no need to carry around anything other than a small, efficient, lightweight device to report. It was useful from a compliance standpoint to use the CellTrak TimeManager solution as a means to cross check the field staff's time and mileage against what was listed in our back end system. CellTrak has been an instrumental tool by increasing efficiency, decreasing costs, and helping us provide our patients more informed and timely care.”

Shawn Roberts, Manager of Information Technology at Lion Health Centers Inc.

Field Staff Safety

Our patented GPS mobile solutions enables you to view locations, manage schedules and ensure safety for your staff in the field.

Reduce Travel Expenses

Travel expenses each month are 15-20% of recurring expenses paid out by agencies. TimeManager reduces mileage reimbursement by at least 20%

Effective Scheduling

Increase revenue without increasing overhead. Schedulers are enabled to manage up to 10 additional clients on average per month.

Improved Payroll Processing

Better utilize your administrative staff by allocating their time to other needs of the agency. TimeManager reduces processing time by at least 75%. Administrative staff's capacity can increase by 10%, creating gains in revenue.

Increase Census

With TimeManager, your scheduling and delivery of care are much more efficient and your staff possess the tools to do more in their current workday. On average your caregivers will be able to visit one more patient/client per week with the use of TimeManager efficiencies.

The Now Factor

Mobile technology is now, and with a growing number of nearly 25% of care providers using mobile devices, the choice is clear. CellTrak is the leading expert in the mobile healthcare market and our solutions match the technology.

Solution Features

Up-to-date schedules

- Field staff schedules are kept up to date in the field
- Access to client information such as address and phone numbers
- Click to map for navigation including turn by turn navigation

Time tracking

- Automatic time capture for direct time spent with clients
- Capture time spent on errands, training, office visits, etc.
- Automatic travel time calculation based on flexible rules configuration

Mileage calculation

- Automated mileage calculation based on shortest distance between visits
- Flexible rules support for start of shift and end of shift visits
- Override capabilities for exceptional circumstances
- Proven reduction in mileage reimbursement. Studies show a reduction by at least 20%

Electronic Visit Verification

- Auto-verify visit location and duration based on GPS coordinate capture
- Capture electronic client and staff signatures at the point of care

Visit Exception alerting

- Reduce risk and improve quality through exception based clinical and administrative alerting
- Proactively deal with late or missed visits

Staffing support through GPS

- Locate closest field workers to staff visits efficiently
- Locate staff in situations where there is safety concerns

Quality of Care Monitoring

- Clearly see performance trends based on configurable thresholds
- Slice and dice data by location, team, discipline, etc.
- Review performance based on staff member or patient receiving care

About CellTrak

CellTrak Technologies, Inc. is the leading provider of integrated Mobile solutions for the home healthcare, community care, hospice, and private duty markets. Our patented mobile solutions run on GPS-enabled mobile devices via a home health continuum technology platform which automates workflow and reduces cost. Data is communicated, stored and integrated using our patented Software-as-a-Service agency management platform, that eliminates the need for agencies to own and manage their own servers. CellTrak applications provides the infrastructure to all Home Healthcare Workers across Canada, United States and the United Kingdom to deliver millions of successful visits each week via CellTrak.
