

Go Mobile with CellTrak

Compatible Carriers and Devices

CellTrak Carriers:

- AT&T
- Bell Canada
- Cincinnati Bell
- Rogers
- Sprint
- T-Mobile
- Telus
- US Cellular
- Verizon
- & many more

When choosing to add a mobile solution to your care team, having a **choice** is important for successful implementation, deployment and return on investment for your organization. Our patented Software-as-a-Service runs on GPS enabled devices that are connected to the visit manager portal in your office for real-time updates. Paper forms will become obsolete and allow for increased visits.

CellTrak offers your care team **choice**.

CellTrak is simple, secure and easy to use. **Millions of successful patient visits are delivered each week** using the CellTrak mobile solution. You choose your carrier, device and network. CellTrak can be used as a stand-alone product or integrated with your current billing, scheduling, and payroll systems. Having a choice with CellTrak will empower your care team to improve compliance, care delivery and outcomes.

CellTrak is compatible with all feature phones, smartphones, and tablets.

Compatible with:

- Android
- Blackberry
- iOS
- Windows Mobile
- & many more
