Are your core systems costly and slow to change?

Are your costs of new product development high and speed-to-market is slow?

Do you see limited revenue growth in traditional distribution channels?

BRIISK INSUR-FINTECH

Briisk Instant Transaction Platform (BITP)
Services, Products and Pricing List

The Briisk Instant Transaction Platform (ITP) provides you with the automation of the complete insurance value chain, at a lower cost and higher speed of your legacy system.

With the Briisk ITP Insurance Services you can pick from pre-configured insurance products and create your own, unique insurance product innovation.

The Briisk ITP is an Azure-based PaaS/SaaS cloud platform providing full scalability, security, reliability and global accessibility with no system administration overhead required by the client.

With cloud-based infrastructure, platform, software services and business processes in place, organisations can become more agile and efficient and turn their entire operations into insight-fuelled, digitally driven enterprises.

Via Briisk's White Labels and APIs, we help our clients automate, digitise, innovate and explore new distribution channels, thereby delivering more value for them and their customers.

- We help you in the most efficient and cost-effective way to run your existing insurance books. You save up to 70% on administration costs.

- The Briisk ITP helps you to automate processes across the insurance value chain, creating efficiencies and speed. With the Briisk platform you cut through cost/risk structures, reducing overheads and increasing your ROI on policy administration, product development and distribution.

- With the Briisk platform you tap into a fully hosted tech solution with API integration.

- We help you to speed up your innovation cycle and reduce product time-to-market. On the Briisk platform you develop and test innovative, digital insurance products for different target and affinity groups, rapidly and efficiently.

- Through digitisation, Briisk brings together the insurance product and the distribution channel and thus, you get instant access to the online mass-market customer database, meeting the digital customer expectation.

- The Briisk platform complies with the latest insurance regulations, allowing for instant data transfer and where required, locally based data storage.

- With Briisk, you can focus on building your digital insurance business, while we look after the technology and the efficiency of your processes.
