anywhere

## People love First Stop Health's Telemedicine

Patients save time and feel better faster thanks to 24/7 access to caring, licensed doctors.

Using our mobile app, website or with a phone call, patients avoid waiting rooms and paperwork –getting the quality, convenient care they deserve.

---

“Great tool and time-saver. Doctor called me back within five minutes. Next stop, the pharmacy on my way home from the office. Wonderful!”

– Mark V., Patient, Kansas

## Our Telemedicine Difference

### Custom Employee Engagement

Telemedicine only works if employees use it. First Stop Health provides employers with targeted communications to encourage use throughout the year.

### 44% Average Utilization

Most telemedicine providers only see 2-10% utilization. Employers deserve more. Thanks to employee engagement, First Stop Health fuels high utilization.

### 125% Savings Guarantee<sup>1</sup>

Instead of going to the ER or urgent care, patients talk with a doctor using our mobile app, website or with a phone call. In fact, we guarantee you will see real savings with our Telemedicine.

### Easy Patient Experience

We make Telemedicine simple. Patients don't need to pre-register — they can contact a doctor whenever and wherever they need.

### Routine Employer Reporting

Only 22% of employers measure the ROI of their telemedicine.<sup>2</sup> We provide quarterly progress reports so employers can know how the service is helping their company.

### Prescription Drug Savings

Help employees keep costs low and feel better with an optional, integrated prescription drug savings card.

<sup>1</sup> For every \$1 an employer spends on First Stop Health Telemedicine, we guarantee they will receive \$1.25 in real savings. It's the same as achieving a 25% ROI, but we guarantee the savings or we'll refund the difference.
