

# Reporting & Analytics

Topia's suite of products share a powerful business intelligence component called Mobility Analytics, providing you detailed reporting and analytics. Configured for your program and available 24/7, Topia's reporting tools ensure you always have the data you need right at your fingertips.

## Key Features

- Available 24/7
- Live and up-to-date data
- Simple pre-configured reports to get up and running fast
- Configurable reports and dashboards for power users
- Drill down in data by just clicking on labels in charts
- Compare budgeted spend to actual
- Powerful data visualization tools
- Security permissions restricting data by region, policy type
- Powered by leading enterprise business intelligence platform
- Easily share or export reports and data
- Included with Topia Manage and Topia Move

## Key Benefits

- Instant access to your mobility data to support strategic business decisions
- Save time accessing the data you need with configured reports and dashboards
- Centralizes all program data (employee demographic, finance, supplier, spend, immigration, tax, operational data, etc.) so you don't need to compile from different systems
- Easily dive into the data behind reports and dashboards for full transparency
- Stay compliant with tax, immigration, and compensation reporting
- User friendly and intuitive interface, yet with the sophistication power users need under the hood

## Spend less time searching for the data to manage your program

With Topia, all of your program data is centralized in a single system with easily configured reports and visualization. This means HR and mobility teams don't waste time compiling information from different systems or spreadsheet into a format that's usable. Instead, Topia users can instantly access exactly what they want, when they want, and presented the way they need in order to deliver true value to the broader business.

## Drive better compliance and control

Topia's reporting features are also invaluable for compliance. You can compare budget to actuals and get a clear grasp of your total program spend by week, month, quarter or year. You can also generate reports for shadow payroll and year-end purposes.
