

HEALTH & SAFETY POLICY

CORROTHERM INTERNATIONAL recognises that the discipline of effective Health & Safety management is an integral part of its management function. The Organisation views this as a primary responsibility with regard to the health and safety of all its employees, its subcontractors, its customers, members of the public and all who come into contact with the company.

In order to meet these requirements, we have implemented an Integrated Management System to meet the requirements of OHSAS 18001:2007.

The Organisation Health & Safety policy calls for continual improvement and periodic review in our Health & Safety management activities, and our business will be conducted according to the following principles:

This policy provides a framework for establishing and reviewing the following health and safety objectives:-

- Ensure staff working for, or on behalf of the company work in safe conditions.
- Follow a concept of continual improvement and commit to the prevention of injury and ill health
- Comply with all applicable legal and other requirements to which the company subscribes that relate to the company's OH&S Hazards
- Communicate our Health & Safety objectives and our performance against these objectives throughout the Organisation and to interested parties
- Ensure that employees and others working under our control are aware of their own individual H&S obligations by communication of this policy
- That this policy is available to interested parties as requested.
