## Information Technology (IT) Consulting with CAS Severn, Inc.

IT Consulting is where it all begins —  
and where we begin.

You tell us what your problems  
are, we analyze what you have,  
we think and talk and doodle and  
design and meet and redesign and  
come back to you with the precise  
IT answer you need based on your  
budget.

Whatever the size of your company,  
whatever your industry, whatever  
your IT issue — we can advise on  
how to improve your technology  
platform, and with it, your bottom  
line.

Consulting means different things  
to different people. To us, it means  
bringing our most experienced busi-  
ness and technology resources to  
bear on providing alternatives and

answers that will help you maximize  
your existing IT investment, reduce  
costs and improve efficiencies.

Our consultants take a structured,  
planned approach, specific to your  
business, your requirements and  
your goals in identifying alternatives.  
Big or small, public or private, CAS  
Severn's IT Consulting Division can  
help you identify the right IT  
answers for your organization.

Our IT Consulting expertise is incor-  
porated into the following areas:

- IT Strategic Planning
- Infrastructure Design & Imple-  
mentation Planning
- Systems & Facility Migration  
Planning
- Business Continuity Planning
- Business Software & Application  
Planning
