Intelligent Answers.

The CAS Severn Difference

Intelligent Questions

We ask questions. And then we listen.

Our clients come to us to solve the really hard problems, not sell a solution in a box.

With deep experience working in the Federal, State, Healthcare, Education and Commercial industries, our technical teams know the right questions to ask, and they understand how IT supports each organization's objectives.

Innovative Solutions.

We work with clients to design solutions that address their unique challenges, with an eye on delivering the highest level of return.

Using a structured approach, a disciplined and well-organized team of subject matter experts and certified project managers ensures quality from beginning to end.

Execution and implementation is guided and governed by our Project Management Office.

Intelligent Answers.

We architect solutions with these goals in mind:

- Reduce total cost of ownership.
- Increase performance.
- Simplify management and reduce operational expense.
- Improve infrastructure security.

Compliance is critical to our clients. We ensure that our teams are trained in the regulations affecting each client.

We don't disappear after the job is done, providing post-sales support and consulting services.

The Advantage.

The CAS Severn value is in solving the client's technology challenge in a way that gives the best ROI, best performance, and best security.

1. Higher ratio of technical personnel than most companies our size, with more than 160 technical certifications.
2. Centrally located in Laurel, MD means we can be onsite quickly and easily.
3. The CAS Severn's Innovation Center has a multi-functional lab and live, working environment that can showcase solutions and services built with best-in-breed hardware and software.

WHAT WE DO

Storage and Systems Management

We specialize in every type and flavor of data storage, as well as storage efficiency technologies such as thin provisioning, compression, and deduplication. The marketplace is seeing an explosion in storage innovation, and CAS Severn invests in staying abreast of the newest options, including:

- Converged and Hyper-Converged Infrastructure Solutions
- Server SAN Solutions
- On-Prem Backup and Disaster Recovery Storage Solutions
- All-Flash Storage Solutions
- Scale-Out NAS Solutions
- Software-defined and Object Storage
- Cloud and Hybrid Cloud Storage

CAS Severn's storage and systems management experts can work with you to customize a solution that will address your organization and industr-specific challenges.

Application Development and System Integration Services

When it comes to application development and systems integration, a one-size-fits-all service approach can leave you stretched thin. A custom approach may be just the right fit.

CAS Severn has been working with corporations, YMCAs, higher education, state and local governments, and the federal government for more than 30 years.

Security Solutions

In a data-driven, highly distributed world, more and more of our clients are asking for a strategic approach to reinforcing their defenses.

If you're ready to transform your cyber security posture, CAS Severn can help you plan, build, and run an integrated and proactive strategy that will protect, detect, prioritize, respond, address, and control security breaches.

- Assessments and Consulting
- Network Management
- Security Intelligence and Event Management (SIEM)
- Data Security
- Identity and Access Management
- Application Security
- Mobile Management
- Endpoint Protection
- Penetration Testing
- Compliance Expertise
