

BRING PEOPLESOFT INTO SHAREPOINT AND MAKE IT MOBILE

Add PeopleSoft Time and Expense Entry, Core HR Employee and Manager Self-Service, Manager Approvals, Benefits Enrollment, Leave Request and more, directly to SharePoint, out-of-the-box

Embedding PeopleSoft into your SharePoint portal has never been easier. Our packaged solutions enable you to quickly and easily plug core PeopleSoft functionality directly into your intranet.

Only InFlight addresses the challenges and considerations that are unique to integrating PeopleSoft into SharePoint. In addition, our packaged solutions also deliver a mobile-first user experience so you can deliver PeopleSoft directly to mobile devices, at the same time.

- Oracle Validated Integration for PeopleSoft Enterprise
- No changes to PeopleSoft are necessary—completely hands-off PeopleSoft!
- Preserves your PeopleSoft security, business logic and customizations
- Apply your look and feel
- Adapt to changing form factors or accessibility requirements
- Streamline PeopleSoft open enrollment in SharePoint
- Implemented in 3-4 weeks
- Works with SharePoint 2010, 2013, 2016, SharePoint Online and Office 365
- Modern, intuitive and responsive user interface plugs into SharePoint
- Managers can approve time, expenses, and POs from anywhere
- Get time reports on-time!

MODERNIZE WITHOUT COMPROMISE

InFlight offers a ground-breaking approach that makes it fast, easy, and affordable to radically transform the PeopleSoft user experience across all device types -- from desktop to mobile -- without compromising the existing business logic, customizations, or security that you rely on.

How It Works

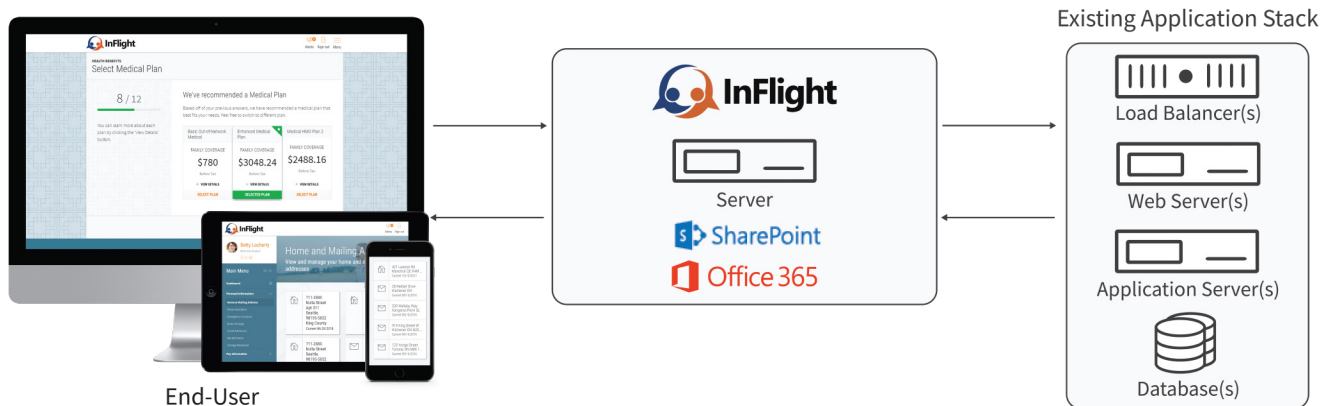

InFlight installs on Windows Server or onto your SharePoint server. It transforms enterprise application content into JSON data objects which can be brought into your portal.

InFlight preserves your enterprise application logic and role-based security out-of-the-box so you can integrate your content into your portal without having to make changes to PeopleSoft or write any code. InFlight enables you to:

- Streamline and modernize the PeopleSoft user experience
- Use mobile-friendly responsive SharePoint themes developed in Bootstrap
- Commingle PeopleSoft with contextual content from 3rd-party systems
- Use PeopleSoft data to create live tiles

InFlight provides Single Sign On from SharePoint to:

- PeopleSoft
- JD Edwards
- Blackboard Learn

"InFlight has the best product in the market to achieve seamless integration between PeopleSoft and SharePoint."
- Microsoft Pinpoint Review
