

Academy of Advanced Manufacturing

Veterans: Transfer Military Skills to a Career in Advanced Manufacturing

Paid training with career opportunities.

Apply today! Limited spots available.

Visit the [AAM website](#) to view the upcoming training schedule.

Why Advanced Manufacturing?

Manufacturing companies are facing a skills shortage and struggling to find talent to fill many critical technology roles. AAM is an opportunity for veterans to be a part of the solution to the problem and fuel the future growth of the manufacturing industry across the U.S. AAM brings together the domain expertise of Rockwell Automation, a global leader in industrial automation, and the insights on changing skills needs and workforce solutions from ManpowerGroup.

Why Veterans?

Veterans possess the core skills to excel in an advanced manufacturing environment and have already been trained in related technology skills during their tenure serving our country, so this is a natural fit. Veterans lead by example, understand the importance of teamwork and can efficiently and effectively work in diverse environments. Their strong work ethic and achiever mindset delivers until the job is done. **Veterans with military and/or civilian experience as a skilled technician with a desire for career growth are encouraged to apply.**

Program Overview

Upskill, stay relevant, and redeploy by developing new advanced manufacturing skills. The 12-week paid training program includes hands-on labs and classroom-based training. Upon successful completion, graduates of this program will be well-positioned to assume an **Automation & Controls Technician (A&CT) role at a U.S. manufacturing employer with wage potential starting around \$50K** (+/- conditional on role/location/shift/etc.). Coursework will include training on network infrastructure, industrial controller products and applications, visualization and safety technology. Also included are a series of soft-skill sessions that focus on teamwork, professionalism and project management.

Eligibility

Veterans with basic electrical and mechanical skills or work experience, which includes hardware and software use, system/equipment installation, set up, troubleshooting, repair and maintenance, are encouraged to apply.

Program Details

Training is located at state-of-the-art training facilities in Milwaukee, WI or Mayfield Heights, OH. All trainees are responsible for initial transportation to the training city. Lodging, transportation to and from training facility, and salary are provided once training begins.

- Accepting applications for upcoming classes – Limited spots available!
- Must commit to a full-time schedule Monday through Friday, roughly 40-46 hours per week, with some optional events occurring after hours/weekends throughout the 12-week program
- Full participation and attendance expected
- Open to relocation resulting from job offer
- All meals, lodging, equipment and tools are provided during training
- Participants will be paid roughly \$600 weekly in training wages during the 12-week training program

How to Apply

If you meet the minimum requirements of basic electrical and mechanical experience, please [apply now](#) or send your resume or referrals to veterans@manpowergroup.com.
