Parallax™

Premium Ambient Light-Rejecting Technology

For environments with uncontrolled ambient light, there's no better solution than Parallax. Our industry-leading surfaces are made of lens-like micro layers designed to achieve optimal ambient light rejection. The result is a bright, speckle-free image without glare - no matter how much light is in the room.

Note: The Contour and Advantage featuring Parallax looks visibly different compared to Da-Lite tensioned screens with vinyl surfaces. This is due to the nature of the Parallax material, a micro-layered, high-grade plastic lens system. While it may have slight variations in appearance, the Parallax surface is optically flat and performs on the same level as our 4K-ready HD Progressive surfaces.
