

Who is M2Gen?

M2Gen is an oncology-focused health informatics solutions company with the mission to help patients gain access to the best treatments by leveraging clinical and molecular data to accelerate the discovery, development and delivery of tailored and more personalized therapies. M2Gen's approach is to integrate clinical and molecular data from cancer patients who consent to an observational study called Total Cancer Care (TCC) Protocol. Patients donate their clinical data and specimens throughout their lifetime leading to new biomarker discovery, clinical trial matching, and population studies examining comparative treatment effectiveness. Creating in silico communities based on genotype and phenotype forms the basis for deep learning and pattern recognition to predict events.

We're searching for a Clinical Research Associate (PRN):

The Clinical Research Associate will support the Scientific Affairs Team by providing routine and ad hoc support, including but not limited to: literature research, document filing, updating business documents and coordination of the review of scientific or medical communications materials.

The education required for this role is:

Bachelor's Degree in Biological and / or Clinical Sciences
Master's Degree in Biological and / or Clinical Sciences preferred

To be successful in this role, we require:

- Minimum of two (2) years of working experience or advanced training in basic science(s) and / or clinical research. Experience gained in an advanced research training program and / or course may be counted towards the two (2) years

We prefer a candidate who also has:

- The ability to proactively solve complex issues in a team environment
- Demonstrated professional, interpersonal and organizational skills
- The ability to adapt to changing priorities

Additional skills and / or specialized training we are looking for:

- Experience / proficiency with biomedical literature search and critical review as well as experience as an author on peer reviewed publications is highly preferred

The Clinical Research Associate is also responsible for:

- Assisting with the development/enhancement and implementation of policies, procedures and processes for the Scientific Affairs department
- Helping to prepare or write various scientific / clinically focused documents, including educational materials, commercial flyers, manuscripts, abstracts and posters
- Performing basic scientific analyses under the supervision of the Scientific Director and other scientific staff at M2Gen
