

COOLING WATER TREATMENT CHEMICALS  
CLOSED SYSTEM CHEMICALS  
BOILER CHEMICALS  
EFFLUENT CHEMICALS

# Introducing B&V Chemicals. Water treatment chemicals and specialist equipment.

## Water Treatment Chemicals

Antifoams & Defoamers  
Biocides  
Boiler Water Treatment  
Cooling Water Treatment  
Potable Water Treatment  
Process Water Treatment  
De-scaling & Corrosion  
Reverse Osmosis  
Solid Chemicals  
Wastewater & Effluent

## Equipment

Dosing Controllers  
Closed System Monitoring  
ClO<sub>2</sub> Generators  
Test Kits

## Legionella Control Support

Water Sampling  
Water Analysis  
Training  
Chloride Dioxide Alternatives

## Solutions For

Pre-Commission Cleaning  
Pre-Treatment  
Feedwater  
Water Re-Use  
Waste to Energy  
Wastewater  
Effluent Management  
Biofilm Elimination

The company was formed in 1977 as a specialist water treatment chemicals manufacturer and is widely recognised for high quality products. We research, design and develop our own chemicals which are manufactured from our purpose-built Daventry (UK) facility. We supply to over 10,000 sites across over 40 countries, worldwide, through water treatment resellers and direct overseas customers and distributors.

We are water safety management and control specialists. Supplying you with chemicals, dosing control innovations and specialist equipment which helps you manage, maintain and control water reliably throughout the water lifecycle.

- British-owned and managed.
- UK R&D and British-made chemicals.
- ISO 9001 accredited.
- ISO14001 accredited.
- 5-day turnaround on nearly all drum orders.
- We hold your fast-moving lines and are ready to pick, pack and ship.
- B&V Chemicals or your own label brand.

Exceptionally strong technical support with on-site and in-field assistance on any aspect of water control, water chemistry, bacteria management, water quality improvement, safety and compliance.

Over 1,500 formulations, including patented products such as ULTRALOX40® - a highly effective biocide that destroys biofilm, we are adding more products and innovative equipment solutions all of the time.

# What you can expect from us

Water chemistry testing and analysis support

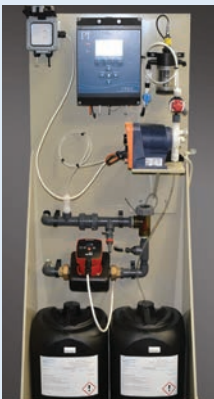

- Dedicated Account Manager
- Laboratory resources and analysis team
- Chemists
- Water engineers
- Technical resource library
- Technicians – boiler chemistry, corrosion management, metal fatigue, microorganisms and bacteria detection in pipe systems
- Potable and process water experts

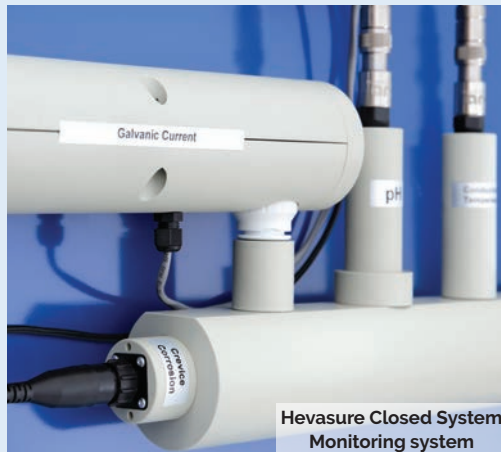

## Deep sector knowledge

We are particularly strong in the following markets;

- Food and beverage manufacturing
- Healthcare and Hospitals
- Leisure and Hospitality
- Medium and large commercial offices
- Petrochemicals, Ammonia & Fertilisers
- Textile Manufacturing
- Glass manufacturing
- Chemical manufacturing
- Metal, Steel, Industrial Minerals
- Plastic & Injection Moulding manufacturing
- Power Generation
- Legionella control
- Biofilm control

Ultralox40® and other disinfection solutions
