

# Reliable Legionella self-testing and diagnosis.

## At a glance

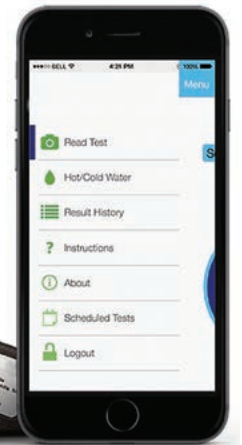

- Detect signs of Legionella serogroup 1 (LpSG1)
- Live, viable bacteria
- Instant in-field, on-site test
- No training required
- Supports UKAS lab testing
- 25-minute results
- Up to 100 CFU/L
- Free App audit trail
- Lateral Flow
- Immunochromatographic Assay (LFICA) technology

## Benefits

- More frequent sampling
- Fast result (25 minutes)
- Self-testing back-up
- Cleaning team result tool
- Demonstration of water quality
- Enhances Legionella control in between UKAS lab testing

## Options

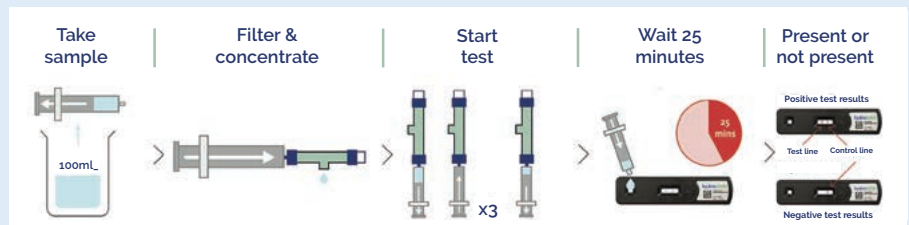

- Single Swab Test Strip
- 10 x Test Strips
- Single Syringe Kit (x 1 test)
- Risk Assessor Test Kit (x4 tests)
- Industrial Test Kit (x 5 tests)

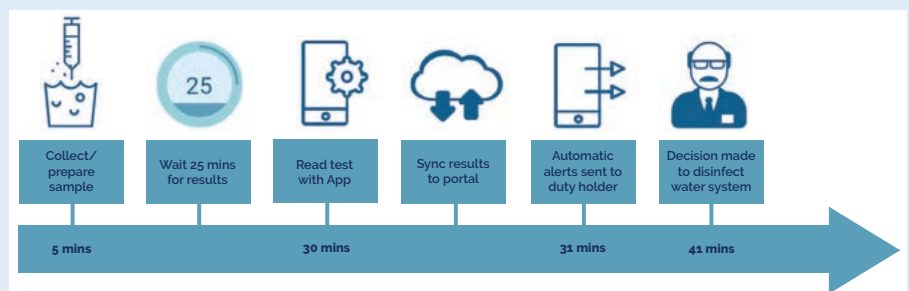

Legionella testing is a standard part of controlling, monitoring and assessing water quality, water distribution system integrity and risk to human health.

The appropriate Legionella testing regime will link back to your Risk Assessment(s) and almost certainly involve UKAS testing which takes 10+ days for the laboratory culture test and certification. Instant Legionella testing does NOT replace UKAS lab testing, it enhances it enabling more regular and self-testing. It also enables you to respond to disinfection and chlorination demands more proactively.

## How it works

## Proactive L8 control

for more information.**

### Legionella Single Swab Test Strip (x1 test)

- Simple to use
- 25 minute result
- From 0.1mL of water
- Sensitive to 100 CFU/L
- No training required
- App enables audit trail

### Legionella Direct Test Kit (x10 strip tests)

- Simple to use
- 25 minute result
- From 0.1mL of water
- Sensitive to 100 CFU/L
- No training required
- App enables audit trail

### Legionella Single Syringe Test Kit (x1 test)

- Simple to use
- 25 minute result
- From 0.1mL of water
- Sensitive to 100 CFU/L
- No training required
- App enables audit trail

### Legionella Industrial Test Kit (x5 tests)

- Simple sample collection
- Fits standard plumbing connections
- Process, Potable and Drinking water
- From 0.1mL of water
- Sensitive to 100 CFU/L
- No training required
- App enables audit trail

### Legionella Risk Assessor Test Kit (x4 tests)

- Simple to use
- 2 x Instant Test Strips and 2 x Syringe Tests
- Process, Potable and Drinking water
- From 0.1mL of water
- Sensitive to 100 CFU/L
- No training required
- App enables audit trail
