Job Title: Installation Technician
Job Status: Full Time
Department: Installation
Reports To: Installation Supervisor

Summary:

Commercial-Industrial Installation Technician installs and maintains a variety of high-efficiency heating systems in a commercial or industrial environment.

Essential Duties and Responsibilities:

- Install new high efficiency burners and boilers. Install new piping systems for gas, oil, water or steam.
- Inspect, examine, and test installed systems and pipe lines, using pressure gauge, hydrostatic testing, observation, or other methods.
- Ability to troubleshoot and repair high efficiency gas and oil burners. Identifying problems with old systems and recommending installation of new systems.
- Lay out full scale drawings of pipe systems, supports, and related equipment, following blueprints and specifications.
- Verify correct operation of equipment related to heating and process boilers.
- Installs thermostatic control and damper in chimney.
- Examines flue draft and changes balance weight to adjust damper.
- Select pipe sizes and types and related materials, such as supports, hangers, and hydraulic cylinders, according to specifications.
- Provide customers with technical product information and provide product training as needed.
- Attends training conferences when new products are introduced.

Qualifications:

Qualifications to perform this job successfully; an individual must be able to perform each essential duty satisfactorily
Pipefitter license is required
Electrical background, welding license and/or plumbing license is a plus
Computer knowledge
Customer service skills
Product knowledge
Safety awareness
Ability to work independently and as a team
Professional appearance
