

## Pass & Seymour

### Night Light with Tamper Resistant Duplex Receptacle NTL885TR

Five adjustable light-level settings including OFF, plus an optional louver for additional light-level options.

Also has **two tamper-resistant outlets**, allowing you to add a touch of safety without losing an outlet.

Hidden sensor automatically controls the night light.

### Extra Heavy-Duty Hospital Grade Power Indicating Receptacle TR8300HPI

Receptacle has an **industry-exclusive two wrap-around green LEDs**.

Offers a clear visual assurance of power indication at the receptacle – even with critical equipment plugged into the device.

Available in PlugTail and a standard back- and side-wire terminations, as well as duplex and decorator styles.

### Self-Test Tamper-Resistant GFCI Receptacle 2097TR

Conducts an automatic test every three seconds, ensuring its always ready to protect. If the device fails the test, the indicator light flashes to signal the GFCI should be replaced.

**Patented SafeLock® Protection** – if critical components are damaged and protection is lost, power to the device is disconnected.

Available in 15 and 20 amp, 125 volt models including hospital grade, audible alarm, isolated ground, tamper-resistant, weather-resistant, RoHS compliant, and NAFTA-compliant.
