

SkyRidge™ Series Metalux WaveStream™ LED Luminaire

An Ideal Solution for Ambient Lighting Applications

A patented optical coupling process maximizes the amount of light injected into a uniformly lit luminous panel, which dramatically improves LED light quality and brightness control. Laser-precise, patented, AccuAim optics arranged in exacting patterns deliver optimal distributions tailored to each fixture and application. WaveStream™ can be applied broadly from exquisite specification-grade designs, to wide-ranging residential, commercial and industrial lighting projects.

WaveStream™ LED Technology

WaveStream™ LED Value Proposition

<p>Optical Control</p> <p>Precise placement of light provides optimal output pattern</p> <p>AccuAim™ Optics</p>	<p>Brightness Control</p> <p>Produces comfortable, inviting, low brightness light with mainstream value</p>
<p>Mainstream Value</p>	
<p>100% Input</p> <p>Up to 95% Output</p> <p>Energy Efficiency</p> <p>High system efficiency provides maximum energy savings</p>	<p>Design Freedom</p> <p>Thin – Transparent - Moldable - Architectural - Patterns</p>

Ideal Solution for Ambient Lighting Applications
