

ASPECT

Recording Devices

The Aspect 2MP 4 Channel Digital Video Recorder (DVR-2M-4-2) is a 4 Channel DVR that can record up to 2MP resolution video footage on all channels. Compatible with all AHD, TVI, CVI and traditional analogue cameras, the DVR offers a range of features suited for the most security-sensitive requirements including smart analytics on both AHD and IP

cameras. The IP cameras connect through hybrid mode allowing for a mix of AHD and IP camera on any installation. Remote viewing is available on smartphones and tablets and is compatible with license free Aspect CMS.

2MP RESOLUTION

The Aspect 2MP 4 Channel Digital Video Recorder can support up to 2MP resolution, there is no longer any need to select a resolution that is either inadequate or too large for the job at hand, Aspect allows you to appropriate.

CLOUD STORAGE

Through Aspect's integration with the cloud, you can store footage, search through recordings by alarm, make firmware upgrades remotely and much more. Snippets of footage such as alarm triggers can also be saved to your cloud-based storage application in an instant, allowing you to store events.

H.265+

H.265+ Compression provides high image quality whilst requiring minimum storage space. Due to Aspect's 4K support, H.265+ is a necessity as it is the most advanced Video Codec available.

UP TO 10TB HDD

With a variety of Hard Drive sizes available on the Aspect 2MP 4 Channel Digital Video Recorder, you have the option to select the recorder that best suits both your camera and footage requirements.

PROFESSIONAL PCB

Aspect has been manufactured with quality and longevity in mind, created using carefully sourced parts and tested rigorously, these products are at the highest end of manufacturing quality.
