

Hubbell Premise Wiring

HEQ QUADCAB® Wall Mount Cabinets

Economy Cabinet for Low Profile Installations

Hubbell's HEQ Economy QUADCAB® wall mount cabinets are a compact solution for crowded telecommunications rooms and entrance facilities. At 14" deep, the HEQ QUADCAB can house many fiber optic enclosures, networking switches, and patch panels with ease. The front door is recessed inside of the leading edges of the cabinet for additional structural support. The rear of the enclosure has a large opening so that it can be mounted directly on top of cables that route through a wall. All QUADCAB wall mount cabinets provide the installer with superior features for quick and easy installation and equipment accessibility.

Features:

- Compact design for small and secure installations
- Aesthetics are suitable for classrooms and offices
- Internal rails are movable for variable depth equipment
- Low profile and small size enclosure yet large enough to fit most fiber optic enclosures and network switches
- Door can be easily reversed without the use of tools
- Provide ample cooling with ease by installing a fan kit
- Mounting holes align with 16" spaced studs
- Large rear opening for easy cable entrance
- 100lb load capacity
- Ideal for retail, classrooms, warehouses and office installations
- Large opening on rear for bulk cable pass through with additional knockouts on bottom and top
- Fan kit easily installs to provide ample cooling
