

USB Charging Receptacles Type-C • Type A&C • Type A

Charge Faster with Hubbell

Hubbell USB Chargers are available in the new Type-C port, a combination unit with Type A and C, and the legacy Type A, all with more power. The increase in power to a 5 Amp 5 Volt USB port adds capacity so that there is always ample current to support multiple device charging. Portable mobile manufacturers recently announced products using the faster Type-C ports. More phones, tablets and other electronic devices are expected to use this new standard.

The USB Charger delivers USB power eliminating the need for adapters, while maintaining electrical outlets for higher current requirements. The new USB standard Type-C port supports faster mobile device charging. Hubbell offers more charging options with Type-C and Type A USB configurations.
