Double-Door Line Isolation Switch

Double Down on Safety with Eaton's Newest Switch

Eaton's double-door line isolation switch is the industry's first compartmentalized fusible safety switch, and the latest product in Eaton's expanding offering of enhanced safety switch devices. The revolutionary two-door design includes an internal barrier that separates the upper switching compartment from the lower fuse compartment. This allows operators to access the fuse compartment with no exposure to line-side power, providing enhanced safety during fuse replacement.

Features and Benefits

Improved Safety

- Isolation of fuse base from line-side power
- Observe position of the movable blades within the switch base
- Prevent doors from being opened when switch is energized
- Maintain isolation from incoming line-side cables within fuse compartment

Simplified maintenance and testing

Increased flexibility
