

Mini PC

SAT-ADV-MINIPC

The Mini PC is an ultra compact PC system, for use with the Concept Pro access control.

The PC offers rapid deployment as it comes pre-registered and loaded with all prerequisite software.

With the modular design of the Mini PC, memory and storage can be easily upgraded.

The Mini PC incorporates 4x USB ports, for which an external memory device can be used to ensure a back-up of the database is preserved.

There is no physical dongle with SATEON; only a software key. This makes for easy work when updating or extending a system as the license files are very small and can be distributed by email.

Key Features

- Pre-loaded and configured with Windows
- 8.1 Professional Intel Core i3 Processor
- VESA Mount Bracket included
- 120GB, 6GB/s SSD
- 8GB DDR Memory
