Real Estate (Commercial)

In today's digital era, Commercial Real Estate companies must be agile and strategic in looking for better ways to build operational efficiency, improve tenant loyalty, and better differentiate and position their properties. Datamax's technology portfolio addresses such challenges by lowering costs, automating processes, and improving communication between brokers, developers, buyers, and investors. ***Count on Datamax to maximize the technology that matters!***

Datamax can help you:

- operate your business at peak efficiency with an IT strategy that fully secures your network and all devices,
- aggregate and share commercial real estate information and documents that are otherwise hard to find, difficult to compile or currently unavailable,
- improve commercial leasing workflow by providing brokers with information that will allow them to collaborate on deals in real time,
- accurately and legibly merge buyer/tenant customer data within forms and distribute them to any printer, fax, email, or archival system, *and*
- deploy enhanced document security to prevent unintended access or loss of information from buyer/tenant files and vendor database systems.

.....

Through relevant technology advisory and total solution deployment, we help commercial real estate firms "go vertical" by maximizing their workflow processes, communications, and bottom line.

Advantages You'll Realize.

Enterprise Content Management

Leverage powerful data capture tools to process varied types of content—including e-mails, applications, forms, virtual tour video files and digital property photographs—into a secure single, standardized/managed system, configurable to the needs and uses of your employees.

Workflow/Forms Management

Improve productivity and reduce time with customized and integrated workflows that combine multiple tasks into single processes. Accelerate real estate purchase or leasing approvals and minimize delays with workflow automation and other business process optimizations.

Graphics Color Printing /Wide Format Printing

Utilize high-quality color and wide-format printers to produce real estate flyers, comps, renderings and master development plans/maps to help enhance presentation effectiveness and competitiveness—all in-house.

Mobile Printing

Offer brokers and property managers the power to print and scan 24/7 on any networked MFP from any location with wireless communications. Access and print emails, applications, tenant memos and more.

Cost Accounting

Leverage MFP account-tracking functions to assign costs to projects or departments with device level, integrated cost accounting systems.

Services We Offer.

Technology Consulting

Align important real estate-related goals with technology through **Datamax Xpert™** consulting. We can help you assess and improve how your current document and information technologies are supporting your core business requirements.

Network Management

Leverage comprehensive network services featuring **TechCare®** Managed IT Services, Cloud Services, Information Security Services, and **TechCare® University** User Training for IT specific initiatives—all supported by 24/7 **TechView®** remote help desk support.

Print Management

Optimize your print output through best-in-class print technology and the industry's most responsive approach to managed print services—**PrintCare™**. All supported 24/7 by **PrintView™**—remote access for printing and connectivity.
